The same 749 final particles of our event under three clustering rules

a circle of the jet's radius around every jet above 3 GeV; the b jet red, the b̄ jet blue, the next six in colour, the rest grey; hollow: in no jet above 3 GeV; black stars: the last copies of the b quarks; diamonds: HOTVR subjet axes

42 jets above 3 GeV, 6 above 30; 368 of 749 particles in them

b quark 78.3 GeV → jet [0]: 99.83 GeV, m = 14.8, n = 31, ΔR = 0.062

b̄ quark 72.5 GeV → jet [1]: 94.09 GeV, m = 17.8, n = 18, ΔR = 0.035

39 jets above 3 GeV, 6 above 30; 356 of 749 particles in them

b quark 78.3 GeV → jet [0]: 99.83 GeV, m = 14.8, n = 31, ΔR = 0.062

b̄ quark 72.5 GeV → jet [1]: 94.45 GeV, m = 18.4, n = 20, ΔR = 0.034

μ = 30 GeV, θ = 0.7, p$_{T,sub}$ = 30 GeV

16 jets above 3 GeV, 3 above 30; 525 of 749 particles in them; 196 groomed away (x)

b quark 78.3 GeV → jet [0]: 170.59 GeV, m = 159.9, n = 105, ΔR = 0.859, 3 subjets

b̄ quark 72.5 GeV → jet [1]: 151.86 GeV, m = 82.0, n = 64, ΔR = 0.384, 2 subjets
