The rest of the protons does not stay quiet: the regularised QCD cross section (page 1)

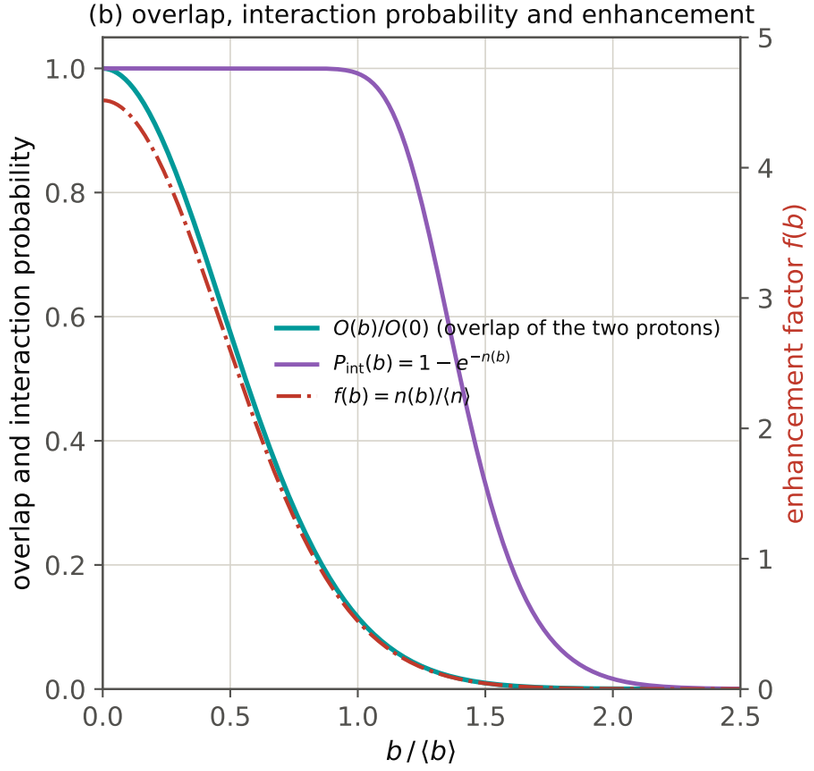

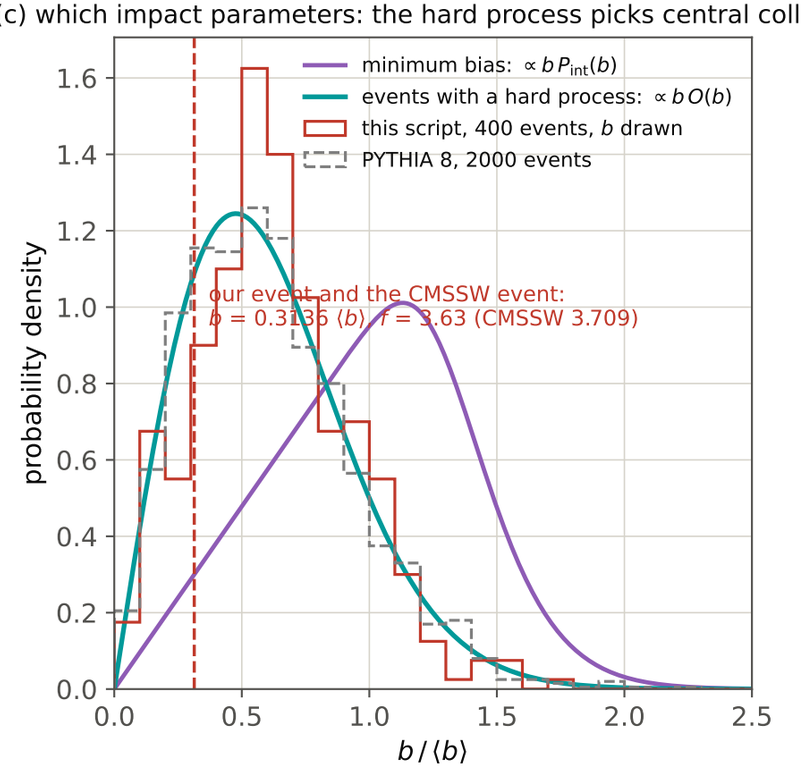

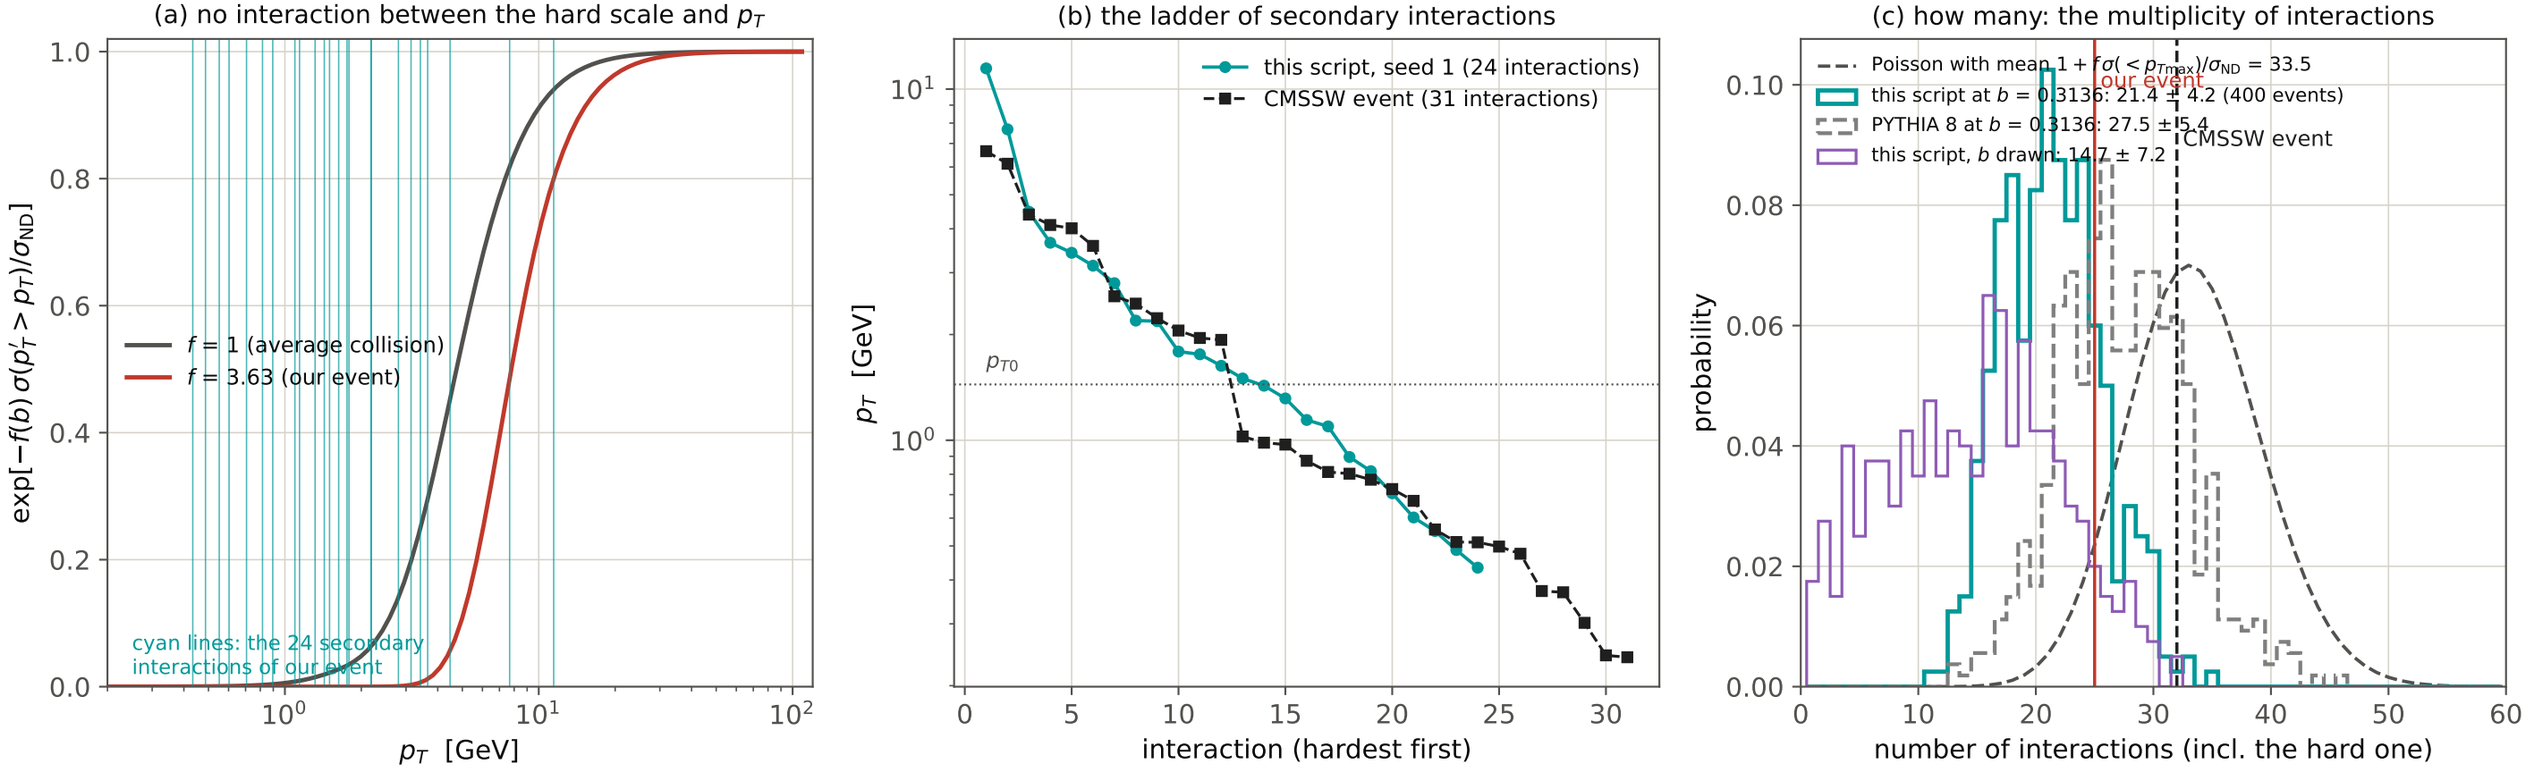

The impact parameter: $\langle f \rangle_{\mathrm{ND}} = 0.97$, $\langle f \rangle_{\mathrm{hard}} = 2.22$, $f(0) = 4.52$ (page 2)

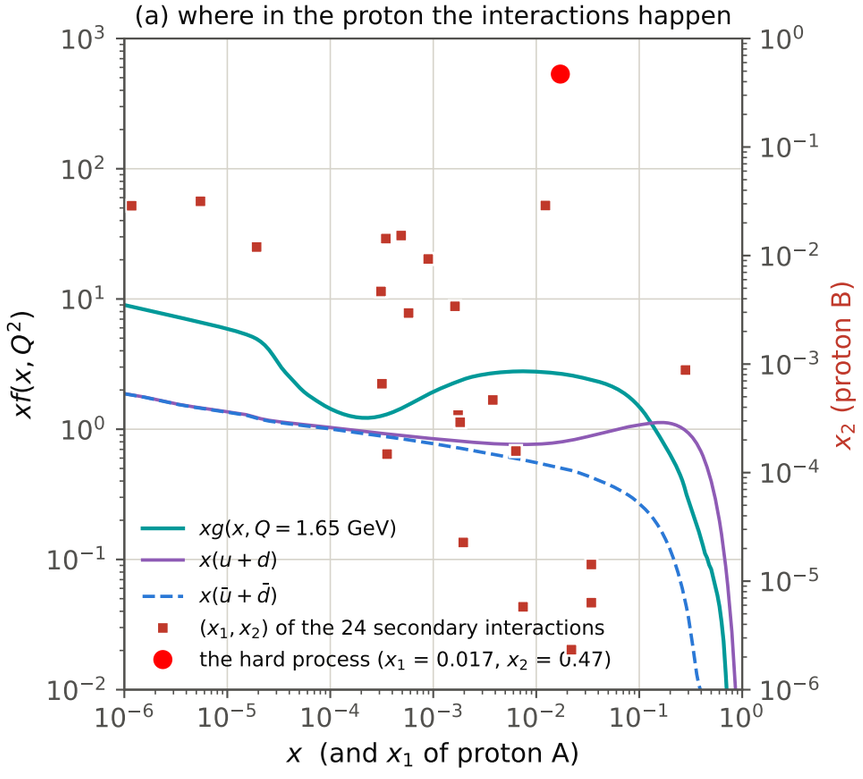

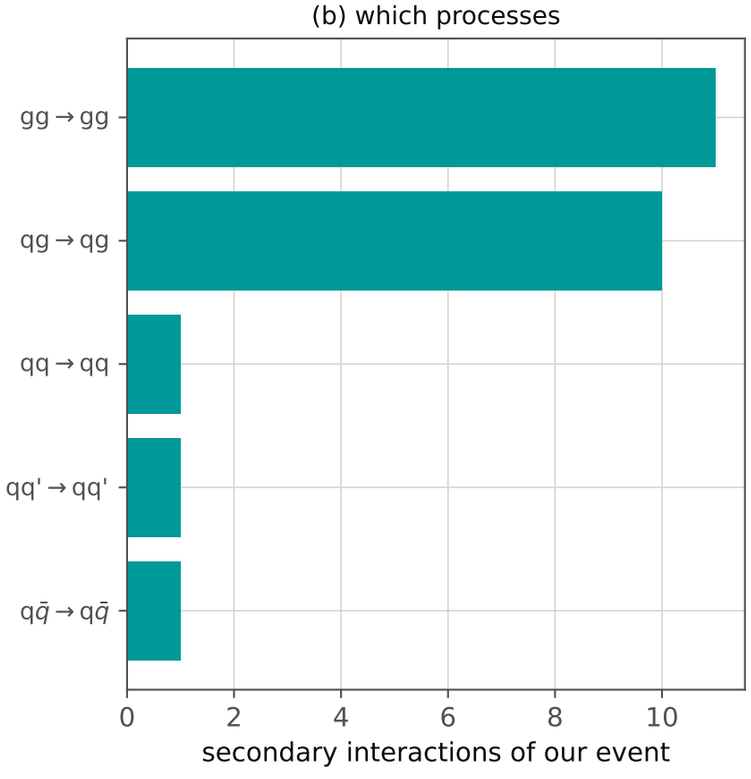

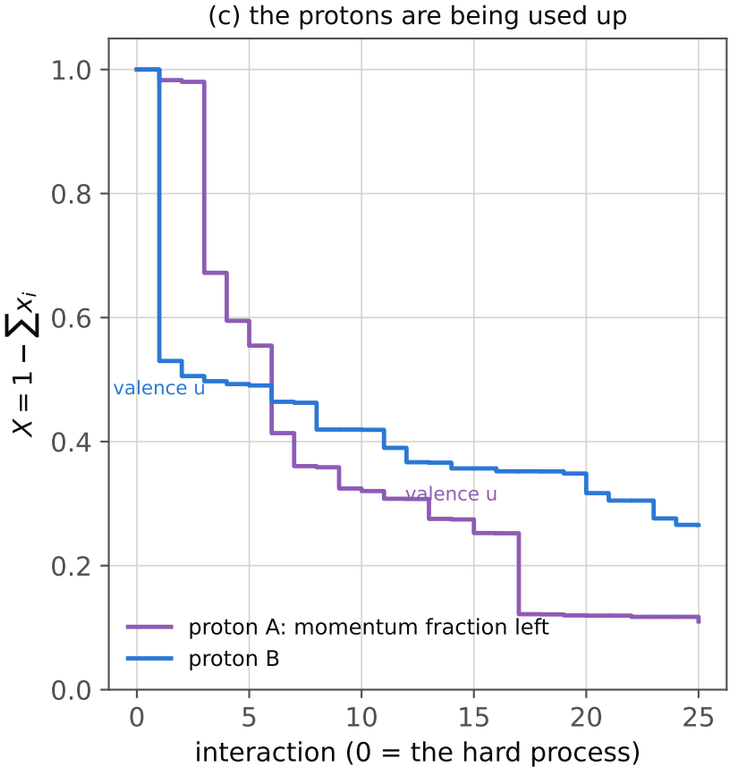

The chain of interactions below the hard scale (page 3)

Flavours, momentum fractions and the depletion of the protons (page 4)

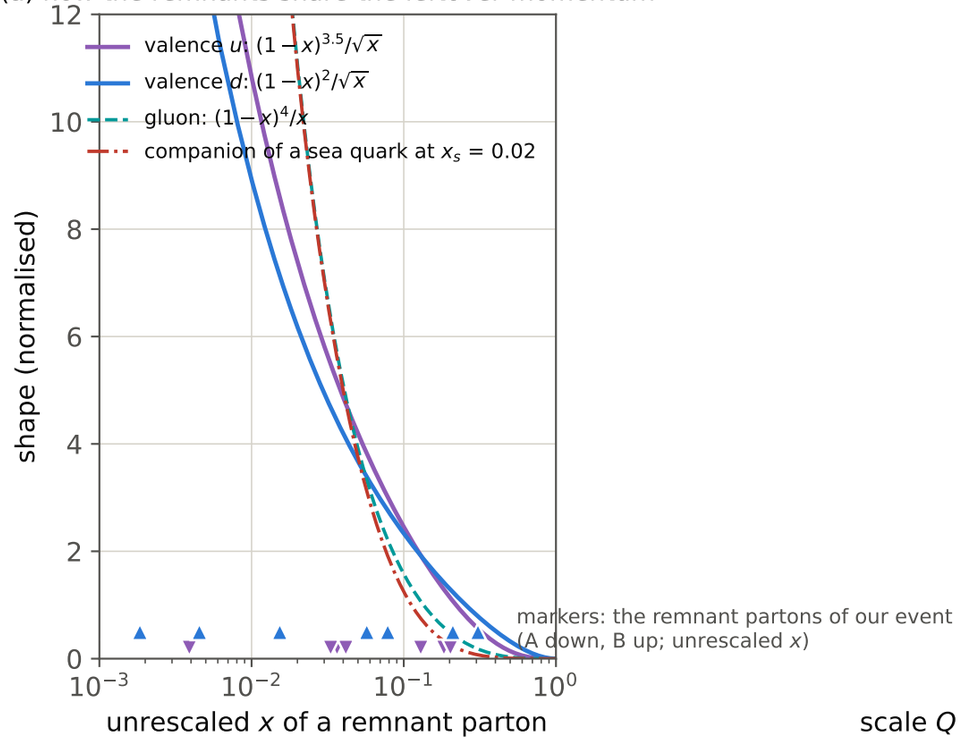

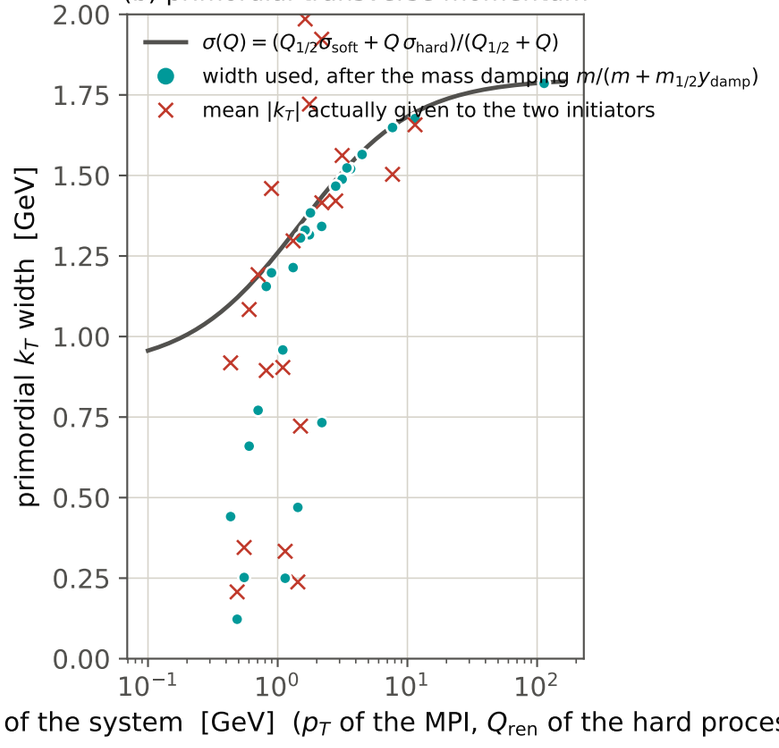

Beam remnants: flavours, momenta and primordial k_T (page 5)

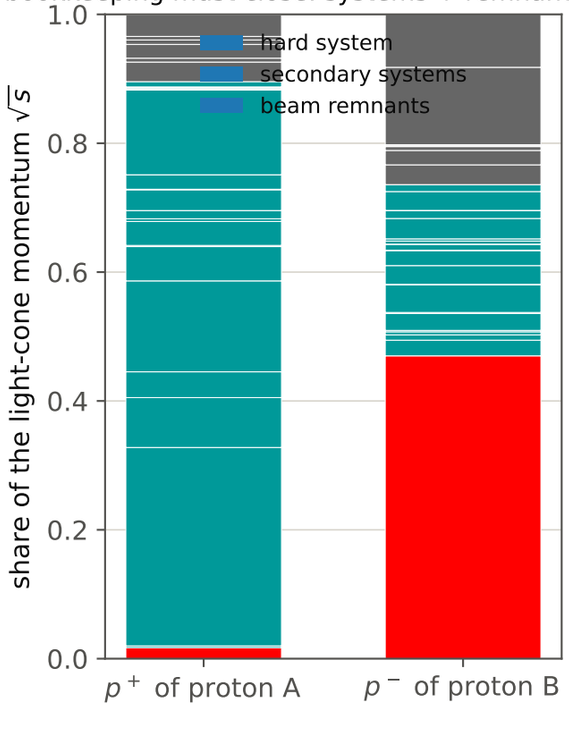

(a) how the remnants share the leftover momentum

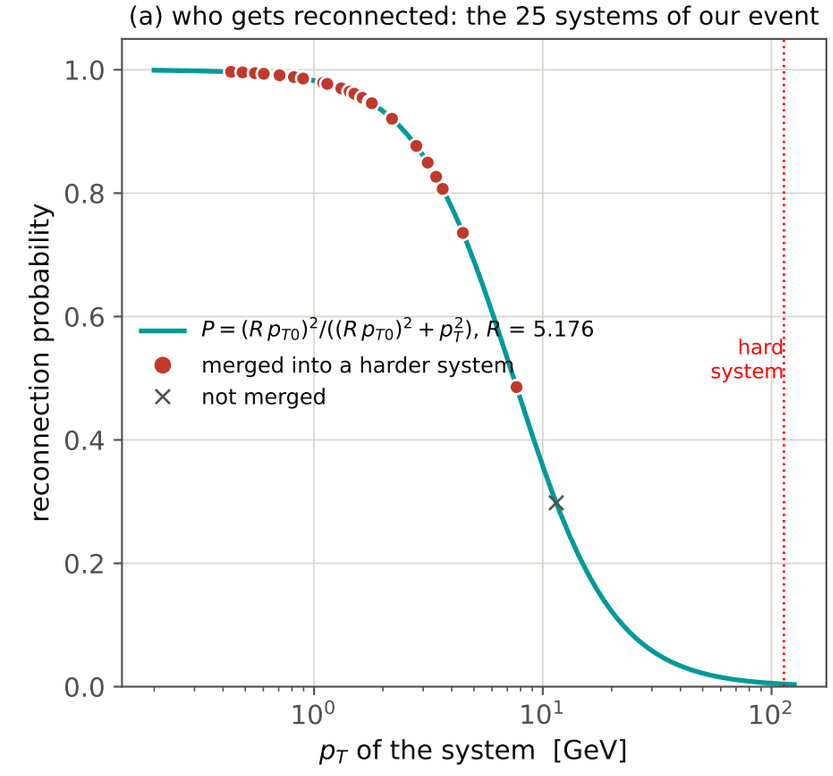

(b) primordial transverse momentum

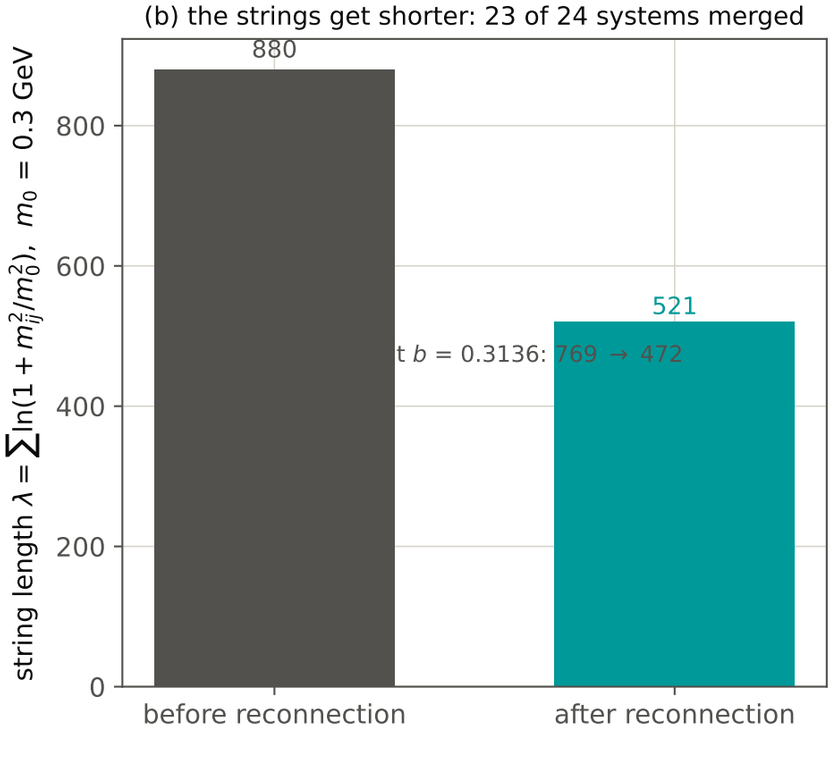

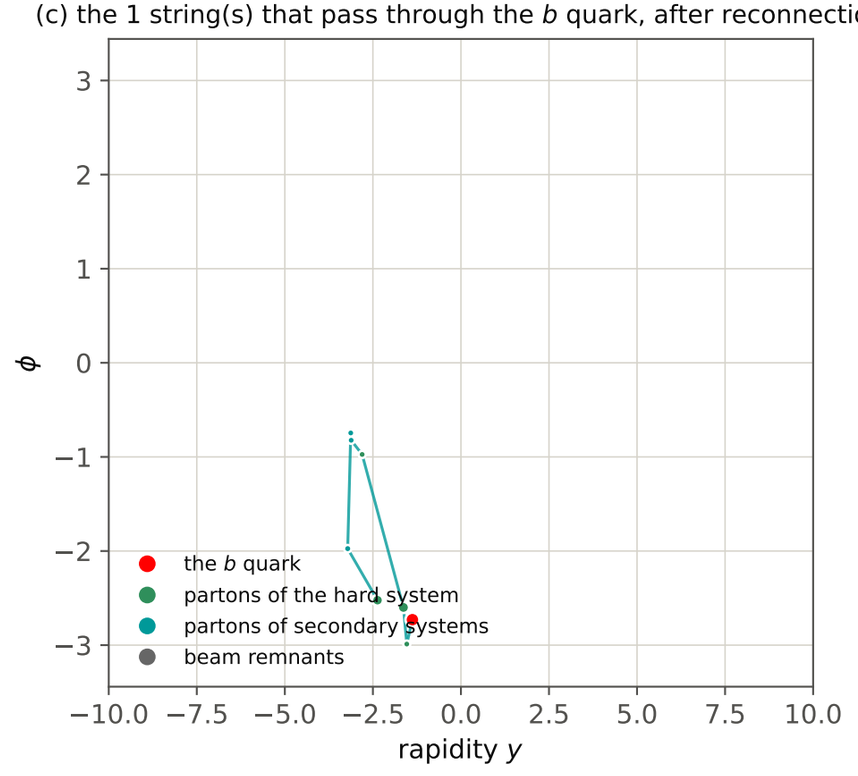

(c) the bookkeeping must close: systems + remnants

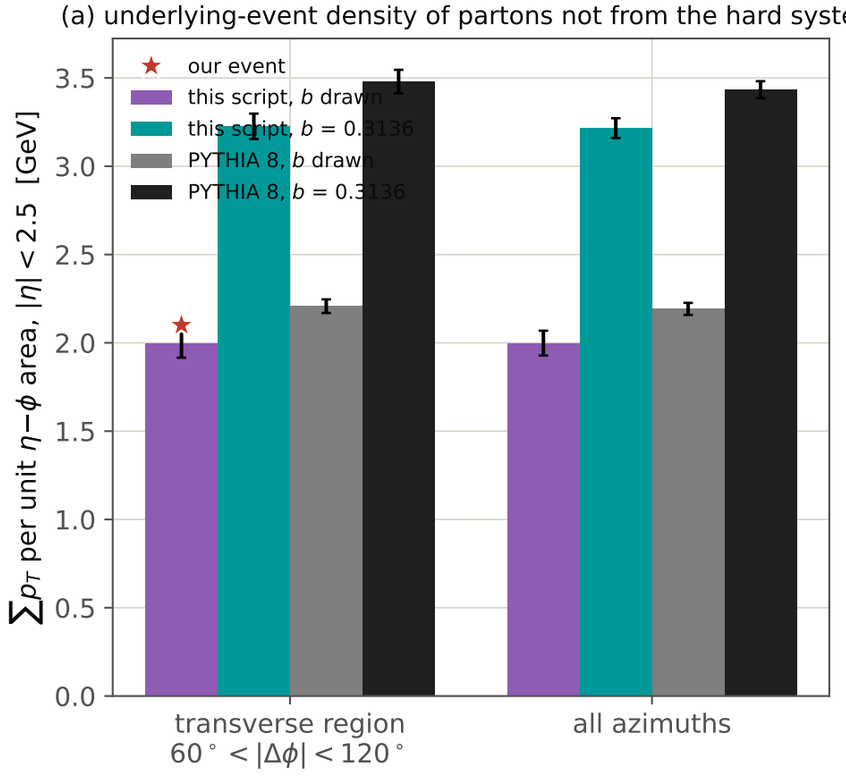

Colour reconnection: the MPI-based model (page 6)

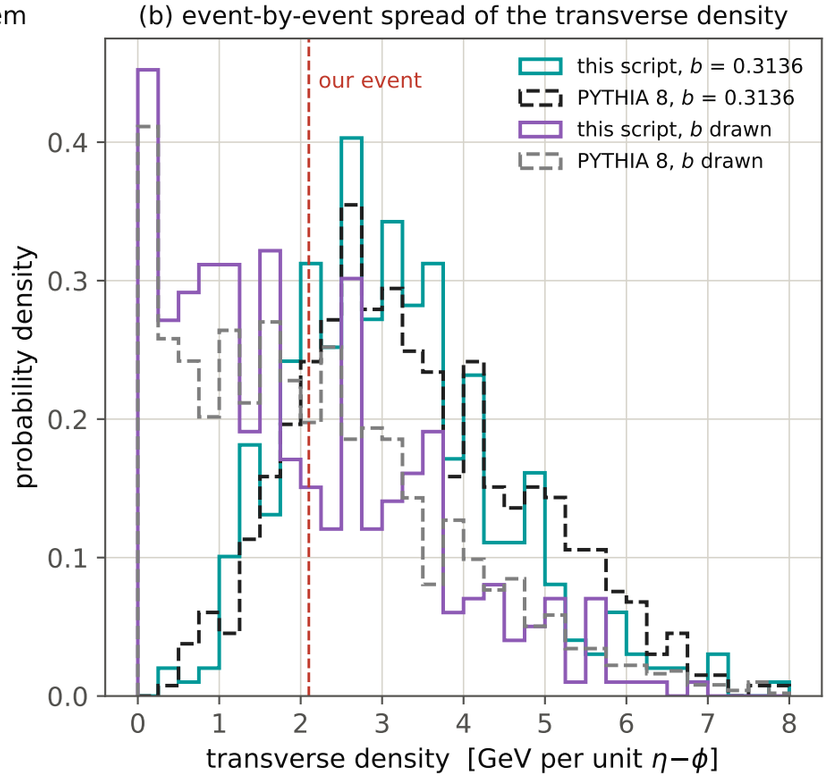

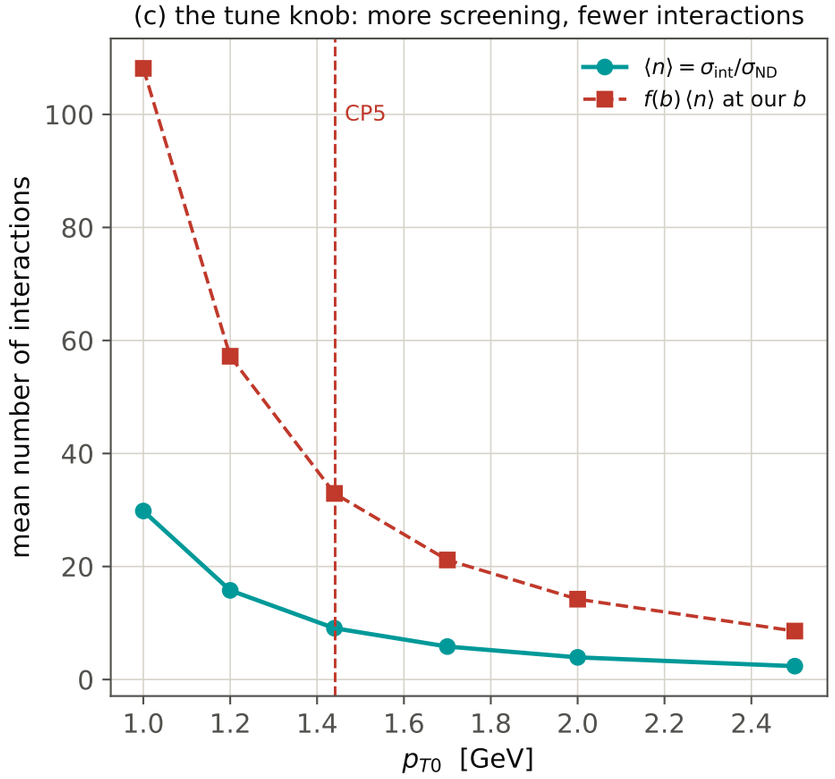

Measuring the underlying event: transverse-region observables (page 7)

Our jet at this stage: UE energy inside $R = 0.4$ and $R = 0.8$ (page 8)
